

printeagle[®] the facts

The fastest, smartest way from artwork to print

- printeagle is Finsbury Green's online preflight, correction and data conversion application for designers and creatives.
- Supplied as a print driver, printeagle processes any file format.
- Seamlessly flight checks and creates a print ready PDF.
- Automatically embeds fonts, applies Finsbury Green's colour calibration, removes four colour blacks and converts RGB to CMYK, on the fly.
- Notifies the customer and Finsbury Green staff that the file has been processed and provides a low resolution PDF proof of the print ready version.
- Saves time, money and resources by providing a sustainable solution.
- Suits broadband users or anyone currently using FTP.
- Processes jobs faster, safer and smoother than ever before. For example

Mb	50	100	200	500
Mins *	5	10	15	20

* Upload speeds are indicative only and are based on ADSL 512kbps broadband configuration
