

Recovery Box the facts

Think outside the square

- The Recovery Box is a reusable box for paper recycling and document storage.
- Used for packing and delivering printed material to Finsbury Green's customers.
- Once empty, it can be easily converted into a paper recycling box, by pushing down the perforated flap and inserting unwanted paper, books, magazines or newspapers.
- Designed to be placed under desks, in common areas (next to the photocopier, laser printer and fax) or used to store documents.
- Reuse the box rather than recycle it each time it becomes full.
- Ask us how you can get with the program and start something in your office.
